Admission: Free

Website: <http://www.sustainability.k.u-tokyo.ac.jp/events/1984.html>

Organized by

Graduate Program in Sustainability Science – Global Leadership Initiative (GPSS-GLI)
Graduate School of Frontier Sciences, The University of Tokyo

Co-organized by

Graduate School of Frontier Sciences (GSFS), The University of Tokyo
&

Todai Institutes for Advanced Study (TODIAS), Integrated Research System
for Sustainability Science (IR3S), The University of Tokyo

BACKGROUND

The Graduate Program in Sustainability Science – Global Leadership Initiative (GPSS-GLI) started in 2012 and offered a new curriculum leading to master’s and doctoral degrees in sustainability science after being selected for “Programs for Leading Doctoral Schools” under the Ministry of Education Culture, Sports and Technology (MEXT), Japan. GPSS-GLI not only provides actual training necessary for future global leaders to make a profound impact on sustainability science and sustainable development on global, regional and local scales, but also endeavors to play a key role in developing networks among institutions of higher education that emphasize sustainability as a core subject of their curricula. Since 2012, the GPSS-GLI has organized an annual international symposium that discusses key issues related to sustainability education at the higher education level. In addition to this general perspective, the special focus on “Kizuna” (絆) was chosen as the theme of the 2015 symposium.
